GSEA -- kegg (migDC vs cDC2)
19 set(s) at padj < 0.05
Ubiquitin mediated proteolysis
Transcriptional misregulation in cancer
Leishmaniasis
B cell receptor signaling pathway
Parathyroid hormone synthesis, secretion and action
Tuberculosis
Neutrophil extracellular trap formation
Aldosterone synthesis and secretion
Hematopoietic cell lineage
Rap1 signaling pathway
Phagocytosis
Calcium signaling pathway
Thyroid hormone synthesis
Gastric acid secretion
Legionellosis
Salivary secretion
Amoebiasis
Staphylococcus aureus infection
Malaria
